Re: Critical Information Regarding Council's Conduct Regarding 5G & Proposed Injunction Against Mark Steele

Dear Mr. Barker:

It has come to my attention that the Gateshead Council is seeking an Injunction against Mark Steele speaking against 5G. I was asked to respond in my qualified capacity and in the best interests of all parties.

I can not summarize the 15,000 hours of objective investigation that went into wireless EMFs as applied, it is important council hold me accountable. Mike Steele should be applauded for stepping up for his community, countrymen, Royal Family, Queen's assets and international community against this extremely dangerous technology as applied.

Radio Frequency EMFs or wireless technology is considered innovative but that consideration happened because critical science was admitted to be missing in exposure codes globally. Causation and biological plausibility linking RF EMFs to adverse health effects was admitted to be missing. That missing causal evidence should have been found before mass deployment of wireless first. Unrealized catastrophic consequences and liabilities have been created by governments and industries moving forward with critical science admitted to be missing.

That missing causal evidence was found and reported through different jurisdictions but those jurisdictions including the ex Prime Minister of Canada Stephen Harper didn't share the science. That undermined Canada as well as the United Nations creating liability in the trillions of dollars.

The Specific **Absorption** Rate test used for the limits of human exposure is a plastic head or body part with liquid in it. The name with "absorption" in it is an admission of harm.

This isn't a debate and your council is relying on a plastic head with liquid in it to supersede all sciences and jurisdictions including medicine,

Due to the fact I was a Registered Intervener in FortisBC application for wireless meters, I was provided the legal avenue by the BCUC to reverse 2 smart meter programs in BC, Canada. That will have a domino effect globally.

Covering the planet with 5G will kill the planet and unrealized hell is coming. The UK and others should be horrified exposure codes admit they are inducing electrical current into people. There is no acceptable induction of current into a baby or adult.

The Reconsideration to reverse smart meter programs will be filed in Canada tomorrow and shared with the UK as well as others. Your council may want to defend 5G but it is indefensible. You can NOT put populations, buildings, infrastructure, ecosystems and atmosphere inside a man made microwave oven. There is nothing on the planet electrically compatible with these EMFs except portable devices. Here are the Reconsideration criteria by the BC Government. It has to be proven the BCUC made an error or exceeded jurisdictions to which both apply.

<http://thermoguy.com/wp-content/uploads/Reconsideration-Guide-BCUC.pdf>

Our jurisdictions and special interests in Canada have fought hard to defend their illegal investment, unfortunately they get to be liable now. Here is a letter that went to City of Kelowna and Council after FortisBC published an article of smart meter safety.

It is critical you follow all links. <http://thermoguy.com/wp-content/uploads/Response-to-FortisBCs-Daily-Courier-Article-Advances-Meters-are-Safe-and-Smart.pdf>

This link is to a letter that went to FortisBC CEO. warning the CEO of a publicly traded company's liability in my qualified capacity as their recognized expert.

<http://thermoguy.com/wp-content/uploads/Letter-for-FortisBC-CEO-Mark-Warren-BC-Hydro-etc-on-Smart-Meter-Program-1.pdf>

This link is to the document calling for the immediate suspension of BC Hydro's smart meter program. BC Hydro can defend the plastic head or disqualify electricity exists. The Auditor General of Canada and Lt. Governor representing the Queen's assets will not be technically overwhelmed by the plastic head. <http://thermoguy.com/re-immediate-suspension-of-b-c-smart-meter-programs-damage-is-measurable-by-the-second/>

This link is specific to your council, health professionals and the MPs who are being lazy and negligent in the representation of the public on wireless. Constituents with valid health complaints are literally being tortured by these EMFs and told they are within the **guidelines** of EPH. Do you really have guidelines for how long you can put a baby in a microwave? Your EPH has guidelines for EMF exposure that can be confirmed trigger nerves and muscles, compromises nervous, hormonal and immune systems at the same time, induces current, changes cellular voltages, changes frequencies in the brain and body, high speed oscillations billions of times per measurable second, etc.

Your entire health system has been compromised from top to bottom,. The entire scope of medical diagnosis has changed except no one informed or consulted medicine globally. What is malpractice insurance and liability for populations misdiagnosed? The domino effect is across industries including education has changed. It is a national and international security issue that can be qualified.

The link is a letter from international health education administration about the accredited medical education program that lectured the missing causal evidence linking RF EMFs to adverse health effects. Your health professionals and EPH can see the accreditation for education credits **required** for ongoing medical licensing. That program was applicable to health professionals in North America. The contact information for the administrator is there and EPH should be contacting the admin to have an accredited medical program in the UK. There are no conflicts of interest and the health admin can answer any questions pertaining to content or faculty. It is the most advanced medical education in the world.

<http://thermoguy.com/wp-content/uploads/Revised-Ltr-re-EM-and-IHF.pdf>

I want to bring the important submission to the Canadian Nuclear Safety Commission to your attention. I was asked to do a submission by constituents in Ontario, Canada regarding an aging Nuclear Power Plants license extension.

<http://thermoguy.com/submission-for-canadian-nuclear-safety-commission-on-rf-emfs-causing-accelerated-corrosion-making-the-power-plants-non-compliant-with-building-codes/>

The Commission's responses have been political and negligent; the Auditor General of Canada and the Lt, Governor representing the Queen's assets won't accept that. The UK has nuclear power and the buildings as well as infrastructure are not designed to accommodate highly penetrating EMFs. The mechanism of interaction by EMFs requires a qualified electrical interpretation first. Once Civil Engineers understand the mechanism if interaction, the mechanisms of action are the atoms and molecules of the engineer's expertise.

The links above contain precedent setting causal evidence, biological plausibility and critical errors admitted to be missing under oath by FortisBC experts for the BCUC application. FortisBC engineer Mark Warren called the mechanisms of interaction a hypothesis because he isn't electrically qualified in any opinion. Dr. Yakov Shkolnikov confirmed the mechanisms of interaction as an electrical engineer.

Exponent Inc's expert witnesses for FortisBC admitted in direct cross examination by me that 100% of all bioelectrical information was left out of their risk assessment report for Fortis.. The plastic head doesn't have or represent biology.

The only design to stop EMFs is an MRI chamber.

I can't apologize to the UK and other countries enough. Our jobs as the government's professionals are to report to and through our authorities having jurisdiction. Those authorities including the Prime Ministers didn't do their jobs.

Canada's Ambassador to the UK Gordon Campbell didn't do his job.

The US plan is to mass install 300,000 mini towers for the 5G grid. Killing your taxpayers, crops, economy and losing the tax base is a national and international security issue. President Trump doesn't know what the previous political interests did. Mr Obama legacy will include the first African American President to put all races in a mad made microwave oven; Trump is making the ovens bigger.

The world shares one atmosphere, 300,000 mini towers affect every country. Heating the atmosphere from space has consequences like extreme weather unlike any seen, fires, floods, droughts, etc and it is already happening.

Gatehead Council should stop the Injunction application through the courts **immediately**. The plastic head and potato used by Boeing for Wi-Fi safety on aircraft is indefensible. Your buildings, infrastructure, etc is not designed to be in microwave ovens. The oscillations of atoms and molecules 180 degrees 1.8 billion times per second, 86,400 times a day is one antenna, wi-fi was 4.9 billion times per second.

The judge isn't aware that 5G and those involved have exceeded jurisdiction. Mark Steele is actually trying to save council from themselves and the constituents they represent. This will be copied to Mark Steele and judge where I will provide the required expert witness on the topic for Gatehead, Mark and the courts.

This isn't going to be popular with any council or industry, the real trade offs are liability without insurance plus criminal liability. If I didn't state what I am in my qualified capacity, I would be liable and undermine Gateshead council which isn't an option.

I look forward to answering any questions or challenges.

Sincerely,

Professor Curtis Bennett
