Re: Environmental Petition

Hi Ron,

Over the last few years I have tried unsuccessfully to get constructive dialog with the Federal Government on the fact that buildings and development are exceeding important Regional Climatic Data as provided by Environment Canada through building codes.

It isn't legally definable as sustainable under the Auditor General's Act and the Auditor General's Office has referred me to you to assist me in the petition to their office so they can assist.

Due to the fact that Canada is responding to the symptoms of an environmental problem with massive emissions and ozone depletion, this is an unprecedented environmental emergency that requires immediate attention.

Based on that environmental emergency, I look forward to your assistance at your earliest convenience.

Sincerely,

Curtis Bennett
