

Wireless Exposure Simplified & Specific Absorption Rate(SAR) Test.

http://www.compliance-club.com/archive/tuv/sar_update.asp

All life depends on the earth's magnetic field, not manmade electromagnetic fields(EMFs). There are important reasons industry and development are wired instead of using wireless.

Wired circuits are insulated wires and the EMFs cancel each other out. Wireless circuits are not insulated and everything hit by the EMFs is in the electrical circuit.

Health Canada's Safety Code 6, FCC and other governing agencies adopted the Specific Absorption Rate for testing. **The picture on the left shows a test model used to represent humans and adverse health effects.** "Can you see the eyes, brain, organs, heart, nervous system, cell structure, voltages, frequencies, electrical changes?" Can you see different considerations for the size of person in the EMF or their movements within the EMFs?

Health Canada's Safety Code 6 governs the limits of human exposure to Wi-Fi, smart meter and cell phone frequencies. Canada, the FCC and other governing bodies use standards based on decades of scientific literature but Safety Code 6 admits science is missing that links RF EMFs to adverse health effects.

Building and electrical codes as 2 examples do not have science missing. The RF EMFs exposure code admitting science is missing is extremely dangerous when stimulating and heating tissue is to be avoided. **Experimental studies show it can lead to nerve and muscle stimulation.** Think of the EMFs like an EMF bullet. In order to hurt you, stimulate tissue or heat tissue, the EMFs have to hit you. The test model above is used for Wi-Fi and Wireless Smart Meters exposure as well. The Wi-Fi device and smart meter aren't held against the head like a cell phone so 24/7 exposure is deemed safe.

The picture to the left is BC Hydro's Smart Grid for smart meters. Can you see how the wireless meters have to communicate with the grid or they wouldn't work.

The Specific Absorption Rate test left out the grid and the bio electrical information of humans. The drawing of the grid substantiates how people, buildings, infrastructure, agriculture, trees, etc are hit by the EMF gun. BC Hydro's grid will cause buildings to violate BC Building Code.

The BC Legislature "entrusted" BC Hydro to install smart meters and the utility can work on meters but do not have the authority to radiate municipalities or large coverage areas. By bypassing regulatory process, BC Hydro has deployed a frequency and biological weapon as applied. Here is a link to the Canadian Nuclear Safety Commission on the accelerated corrosion of buildings and transcripts from the BC Utilities Commissions. The smart meter program is illegal right now and the damages to people, buildings, infrastructure, crops, etc is measurable by the second.
